

## Irma United Church 42nd Anniversary Services and Supper Largely Attended

The 42nd Anniversary Services and Supper of the Irma United Church held November 16 and 17 were highly successful and most enjoyable.

A large attendance at the service on Sunday afternoon necessitated the help of R. Haugen and his loud speaker to relay the music and address to the overflow congregation in the church basement.

Rev. N. Knight from Viking who has spent many years in the China Mission Field, was the guest speaker. He read from the first two chapters of Nehemiah, telling of that prophet's distress over the broken walls of Jerusalem and of how the people were encouraged to rebuild them. Mr. Knight then gave some interesting stories of the walled cities of China and of the benefits the people had when the walls remained unbroken. He then reminded us of the broken walls of our own spiritual citadels which result in broken homes, broken faith and spiritual degradation. He exhorted one and all to take part in a national rebuilding of our moral and spiritual defenses and that we rebuild them on the Rock Christ Jesus.

All hymns at this service were most heartily sung and the choir gave two fine anthems.

On the following evening the Anniversary Supper was held and very largely attended. The new facilities in the enlarged and redecorated basement and the truly wonderful management of the two W.A. groups made the handling of such a large supper party seem to be done by magic. No one had to wait for a place to eat because everything was done in such an orderly way that a table was just being set up or just being emptied all the time. As to the quality of the food served it was unobtainable.

A program followed the supper, with Rev. H. W. Inglis in the chair. And as he remarked, the Anniversary had truly been a "united" Church effort. He mentioned the gallant work of the two W.A. groups. The service rendered by the choir and how the Men's Club and the church carpenter, Mr. Craig, had all added to this happy occasion. The new piano, the basement floor had been paid for by a YPU group of two years ago. The younger groups had also a hand in making things go for the OGIT added the church service in uniform and at the supper some of them did "baby sitting".

Mr. Norman Knight, Carol Smallwood recited and a vocal duet was given by Irene and Coleen Archibald. A piano duet by Mrs. Glasgow and Della Symington. A violin and piano duet and encore by Mr. O. Nissen and Miss Joan Nissen and an anthem by the choir. Rev. N. Knight again addressed the gathering and spoke of his call to mission work in China. He told of the fine people he had been privileged to work among and how he felt he had more friends in China than in Canada. He touched briefly and without bitterness on the Communist forces which made it necessary that he and other missionaries must return home. He spoke of the appreciation the Chinese felt for what had been done for them and reminded us of the many privileges we have here and how we must show our appreciation to God by praying for those in China and other lands and by a deeper loyalty to Jesus Christ.

## Canada's Forest Wealth

A GREAT DEAL IS HEARD TODAY about the wealth of Canada's natural resources, and this country is indeed fortunate in possessing many of the materials essential to modern industrial development. New discoveries of oil, gas, iron and uranium have attracted widespread attention and the prospect of developing these resources is followed with great interest. We are sometimes reminded, however, that one of our resources, less spectacular perhaps than some of the others, creates more wealth for Canada than the output of all her mines, or all her grain crops combined. Pulpwood, which is taken annually from our forests, remains one of our richest resources and one which is of great importance to Canada's economy.

### Large Tracts Of Woodland

Canada's forests cover nearly one and a half million square miles of the country, and more than one half of the land area of all the provinces is made up of forests. In comparison, only one-fourteenth of the total land area in Canada is under cultivation or useful for pasture. Even the so-called "Prairie Provinces" have large tracts of forest lands in some districts, while in British Columbia, the Central provinces and the Maritimes there are large areas of forests. Not all these woodlands are useful for lumbering. Large areas are not yet accessible by roads and others do not have growth suitable for making lumber or pulpwood. At present some 140,000 square miles are leased to companies engaged in the making of pulp and paper, this land being situated mainly in Eastern Canada and in British Columbia.

### High Losses Each Year

There has been concern in recent years regarding the depletion of our forests and much attention has been given to conserving them. However, authorities on the subject say that the average annual consumption of wood for the manufacture of pulp and paper consumes only one-fifth as many trees as do fires, insects and disease. These destructive forces account for twenty-one per cent. of the entire consumption of forest products in Canada each year and constitute a grave menace to this important source of wealth. Constant improvements are being made in methods of forestry and in the control of forces which lay waste our forest lands. Many Canadians may forget the importance of this great national asset, but a recent publication put out by the Canadian Pulp and Paper Association reminds us that "the pulp and paper industry stands first in the numbers employed and wages paid, first in export trade and first as a creator of wealth for all Canadians."

### WHERE EXTRA CAUTION SHOULD BE TAKEN

Every bottle and package in the medicine cupboard should be carefully labelled and, in the case of dangerous drugs, some special means of distinguishing such containers should be adopted. A band of adhesive tape around the bottle will serve as a warning that this bottle must be handled carefully. In addition, all dangerous drugs should be kept out of reach of children.

### Excellent Beet Crop In Manitoba

WINNIPEG.—Several hundred Manitoba beet growers will receive a total of \$1,250,000. Cheques for approximately that amount mailed by the Manitoba Sugar Company, Fort Garry, to contract growers as an initial payment for beets delivered in September. Company officials said that the initial payment of \$8.40 a ton was the "highest on record." Last year's payment was \$4 a ton.

For the 1951 crop, farmers received a total of \$14.30 a ton. Company officials declined to speculate on what this year's final payment would be. Quality of the crop, including purity and sugar content, was reported "considerably better than in previous years."

## No Shortage Of Cars To Move Prairie Grain

EDMONTON.—Officials of the Canadian Pacific and Canadian National Railways said that they have sufficient boxcars available to move the amount of prairie grain that can be handled at the lakehead and west coast terminals.

Vice-President J. R. McMillan of the C.N.R. and Vice-President D. S. Thomson of the C.P.R., both from Winnipeg, were in Edmonton inspecting company facilities.

Mr. McMillan said his company and the C.P.R. are "using all the cars needed" to keep up with the terminal requirements on Prairie grain.

He said to date the terminals have been able to handle the grain no faster than the railways have been able to ship it.

Mr. McMillan said Saskatchewan and Manitoba grain is not being given priority over Alberta grain because those provinces are closer to the Lakehead, thus enabling more shipments to be made than on the longer haul.

"Grain is moved on orders of the Wheat Board and the Federal Transport Controller," Mr. McMillan said. "The quota system determines how much grain will be transferred from any given area."

Total fatalities for the nine month period were 235 compared with 226 for the same period last year.
